Step 4. **Rear Bracket Attachment:** Move the slide rails back approximately 10 inches. You may need to loosen the thumb screws to do this.

Attach the Rear Rack Brackets as shown below. Attach using (4) 8-32 x 3/8” Truss Head Screws and (4) 8-32 Nuts. The screws should be located in the slots as far apart from one another as possible (see below). Tighten all screws.

Note: If installing CMA refer to CMA instruction at this time.
Step 5. **Monitor Attachment:** Turn the monitor face down on a large flat surface. Locate the four VESA mounting holes on the rear of the monitor.

a. **Determine if spacers are required:** Some monitors have "recess" on the rear of the monitor. Spacers are provided to fill this gap. See Table A for spacer length options.

b. **Determine Screw Length:** Only use the metric M4 screws provided. Screw length is determined by the spacers used (see Table A).
